Dear Attorney General John Ashcroft;

Now is the time to drop the charges against Microsoft and get on with the real business at hand, the Enron mess!! Microsoft has not caused thousands of people to loose their jobs, caused millions of people to loose much of their life savings, and to be so closely tied to the Bush administration, that it causes concern among voters. Microsoft is just doing a better job than the rest and should be allowed to continue it's leadership role. We all benefit from their expertice.

Dale Schendel, Bloomington,

Mn
